Hygiene meets aesthetics.

The symbiosis of maximum hygiene and sophisticated design is what characterises the cleanrooms of Schäfer Einrichtungssysteme. The demands and requirements vary enormously depending on the project and installation situation. Yet all projects have one thing in common: They all require state-of-the-art, hygienically optimised, aesthetically pleasing, easy-to-clean and durable solutions that are carefully thought-out down to the last detail. This is our specialisation at Schäfer Einrichtungssysteme.

For us, meeting the highest standards of hygiene goes hand in hand with perfectly coordinated functional aesthetics. When you decide on a changing room, airlock or cleanroom furniture from Schäfer Einrichtungssysteme, you are making the choice for holistic hygiene and outstanding quality based on the secure foundation of experience, know-how, reliability and attention to detail.

We offer you cleanroom furniture tailored exactly to your needs for either furnishing a new facility or expanding your existing furnishings. Tailor-made and manufactured with our many years of expertise.

Company profile

schäfer[®]
Einrichtungssysteme

Hygiene trifft Ästhetik.

When you decide on cleanrooms from Schäfer Einrichtungssysteme, you are making the choice for holistic hygiene and outstanding quality based on the secure foundation of experience, know-how and reliability. Share of production in Germany

Our promise
Quality from a single source. From the first consultation to production and beyond

Our responsibility
We are committed to ensure that our resources also future generations be preserved

Our claim
Reliable, pragmatic, future-oriented

Sustainability

schäfer[®]
Einrichtungssysteme

Hygiene trifft Ästhetik.

We are already making a contribution to sustainability and environmental protection in many areas of our daily work. Sustainable management and careful use of resources are a matter of course for us and part of our corporate philosophy.

Our contribution:

- Separation of recyclable materials and feeding them into the material cycle
- The generation of CO²-neutral electricity with an own 400 kw photovoltaic system on the roof. This is trendsetting
- The company's own heating system is supplied with all wood waste materials for a CO²-neutral heating of the company buildings
- The wood used comes from sustainable and responsible forestry
- It is important to us that our resources are also preserved for future generations

Competence

schäfer[®]
Einrichtungssysteme

Hygiene trifft Ästhetik.

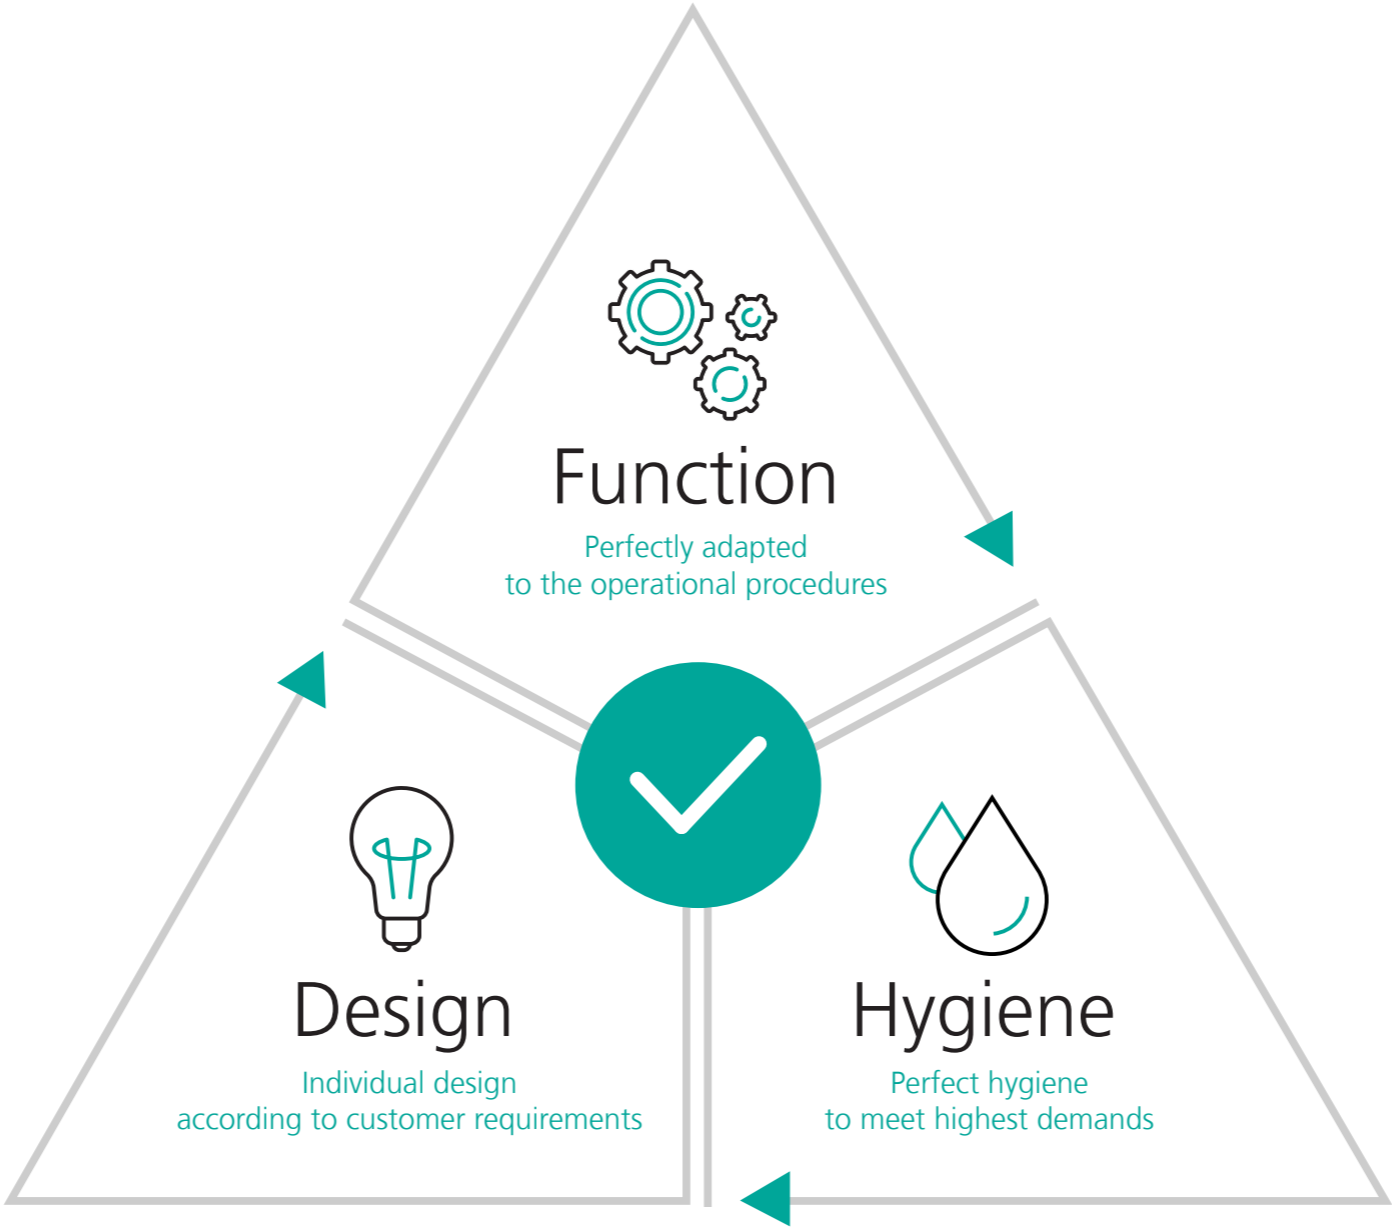

We believe in automation because automation creates:

- Consistent quality
- High-precision fitting accuracy with different materials
- Jobs
- Competitiveness
- Intelligent and individual product solutions
- More qualified employees

Over the years, automation has created additional jobs and enabled the professional development of our employees.

The Schäfer "Principle of quality"

- Or even go beyond them
- Modern machinery and highly qualified employees
- Energy-efficient production

INSTALLATION

- Installation teams trained by us

SERVICE

- We are there for you from the first enquiry until installation
- Through our nationwide network of installation teams, we can be on site quickly in the event of service

Staff changing rooms

Staff changing rooms. Optimum storage and maximum safety.

We specialize in staff changing rooms of all kinds – from pure outdoor shoe lockers to special changing rooms in transitions to cleanrooms: We offer you user-friendly solutions that are perfectly tailored to your purposes. Optimum storage options combined with maximum security for personal belongings is an essential criterion for functional staff changing rooms. Locking solutions for Schäfer staff changing rooms are also employed entirely according to your wishes. Contactless use of changing rooms and safe deposit boxes is possible at any time thanks to cutting-edge transponder technology.

In addition, the Schäfer product range not only includes the actual furniture required for staff changing rooms, but also a wide variety of options for wet areas. Our sister company, Schäfer Trennwandsysteme GmbH, meets individual customer wishes in the area of shower and WC partitions, wet room doors and washbasin solutions, thereby complementing our product portfolio. The result is a consistent aesthetic and functional unity in terms of design and material selection.

Staff changing rooms

Functional furnishings. Customised.

- 1** Staff changing rooms with colourful accents furnished with perfectly matched clothes lockers and pre-built benches made with high-quality HPL solid core panels
- 2** Colour-coordinated clothes lockers and sit-over bench with integrated shoe compartments add the final touches to the staff changing room. These flush-fitting HPL fronts are not only extremely robust and durable, but also extremely easy to clean
- 3** Cleanliness thanks to floor-to-ceiling HPL wall panelling with motif printing. Staff changing rooms become one-of-a-kind spaces that create a specific impression and mood
- 4** Staff lockers with elegant glass doors and state-of-the-art transponder locks enhance every staff changing room
- 5** Valuables compartments made of 13 mm solid core panels and customised motif print. A very functional and impressive overall solution.

Staff airlocks

Staff airlocks. More than just a functional entrance and exit.

Personnel interlocks allow access to sensitive production areas, research facilities and cleanrooms. They also form the standard-compliant transition between different cleanroom classes, thereby preventing contamination of downstream cleanrooms. Staff airlocks help to meet and enforce the strict regulations and specifications for cleanrooms. Human beings are generally the biggest source of contamination in the production process.

Our service range impresses with its holistic furnishing concept for staff airlocks, staff changing rooms and cleanrooms. We custom-produce your cleanroom and airlock furniture to suit your needs, guaranteeing the perfect realisation of your individual building project.

Staff airlocks

Functional furnishings. Customised.

- 1 Spacious staff airlock with lab coat lockers, free-standing bench and removal cabinet for disposable or reusable items, made of robust HPL solid-core panels
- 2 Staff airlock with sit-over bench and slippers shelf, combined with a clearly arranged storage cabinet with high-quality glass doors
- 3 Staff airlock equipped with clothes lockers in contrasting colours and sit-over bench with integrated shoe compartments. Robust HPL panels combined to create a modern, yet highly functional design
- 4 Functional washing area made of HPL material

Staff airlocks

Cleanroom furniture

Cleanroom furniture. Customised solutions for every room.

Schäfer plans and manufactures its cleanroom furniture according to the specific requirements and working environments of its customers. Material, form and function are coordinated according to need. Thanks to our modular locker systems, we can realise nearly almost all variants and customer wishes. This guarantees everything from design flexibility in the choice of colours and surfaces to a holistic cleanroom solution. With our customised cleanroom furniture, you can be assured of optimal solutions and maximum space utilisation, even when space is limited.

The choice of materials depends on your wishes and requirements. Stainless steel and HPL have proven their worth in cleanroom furniture. Due to their durability, value and high resistance to chemicals and disinfectants, they are the most commonly used materials in cleanrooms. However, high-quality glass, aluminium or powder-coated steel are also sensible choices, depending on the application. Feel free to ask us. We will be happy to advise you!

Cleanroom furniture

Functional furnishings. Customised.

- 1 Integrated viewing windows in the staff lockers ensure a maximum overview at all times
- 2 Open removal cabinets with integrated drop covers guarantee a clear view inside the cleanroom. Different furniture designs using different materials (here: HPL and glass) not only organise the cleanroom, but also give it its high-quality character
- 3 Removal cabinets with integrated drop covers belong in every cleanroom. With high-quality and extremely robust materials such as HPL, cleanroom furniture still looks like new even after years of use
